PROFILE

**I design products that help people
navigate complex systems.**

I'm interested in how digital and physical systems intersect, and how technology can contribute to more equitable and engaging communities.

SKILLS

Product Strategy, Systems Design
Information Architecture, Interaction Design
Product Discovery & Research
Complex Workflows, Data Visualization
Front-end Prototyping, Design Systems
AI-assisted Product Development

EDUCATION

University of Pennsylvania School of Design
Master of Landscape Architecture and Regional
Planning (MLA)

Master of City & Regional Planning (MCP)

Georgetown University
B.A. in Psychology

RECOGNITION

2013 Knight News Challenge on Open Government Finalist
2012 ASLA Honor Award for Analysis & Planning

2026 Citrine Informatics 2021 - Present

Director of Product Design | 2023 - Present

- Lead product design for an AI platform that helps scientists and engineers move from experimental data to predictive models, recommendations, and new experiments.
- Led design of a next-generation Data Manager spanning search, filtering, comparison, visualization, and data ingestion; built a working prototype used by Engineering as its implementation reference.
- Build working prototypes with Claude Code and other AI-assisted tools to explore complex workflows, test concepts with users, and refine designs before implementation.
- Define the platform's conceptual architecture and reusable interaction patterns across complex, interconnected workflows.

Senior Product Designer | 2021 - 2023

- Redesigned core scientific workflows and established scalable interaction patterns and design-system foundations across the platform.

2020 Vistallogic Jun 2015 - Jun 2020

Senior User Interface Designer

- Led product design and front-end development for Clara, an enterprise platform supporting coordinated healthcare and social-service delivery across government agencies, nonprofits, and community organizations.
- Built a scalable design system and reusable interaction framework for complex case-management and cross-agency workflows.

2013 Test/Plot Studio, Brightwaters, NY Jun 2013 - Present

Founder

- Designed and built Possible City, an open-data mapping platform helping communities identify opportunities for citizen-led reuse of vacant properties; finalist in the Knight News Challenge on Open Government.

2012 James Corner Field Operations, New York, NY Mar 2012 - Jun 2015

Project Designer

- Designed and managed landscape and urban-design projects including Columbia University Manhattanville Campus and Waterfront Seattle.

2011 Future Green Studio, Brooklyn, NY Mar 2011 - Mar 2012

Associate

2008 Wallace Roberts & Todd, Philadelphia, PA Aug 2008 - Mar 2011

Urban Landscape Designer

2004 UNIVERSITY OF PENNSYLVANIA GRADUATE SCHOOL OF DESIGN

2000 Site59.com / Travelocity.com, New York, NY Mar 2000 - Jun 2004

Director of Interface Design, Senior Web Designer

- Managed a team of five designers and front-end engineers responsible for Site59.com and more than 20 white-label travel partners.
- Following Site59's acquisition by Travelocity, contributed to a major redesign of Travelocity.com and helped establish shared design and front-end practices across the organization.
